DOE/RL-96-39, "100-NR-1 TREATMENT, STORAGE, AND DISPOSAL UNITS
CORRECTIVE MEASURES STUDY/CLOSURE PLAN," REV.1

Att 2 5600

The subject document is attached for your use (Attachment 1).

This document was revised to incorporate changes made to Appendices A and B, which resulted from modifications made to the Hanford Facility Resource Conservation and Recovery Act of 1976 (RCRA) Permit, Dangerous Waste Portion. These Appendices present the closure plan for the 1301-N Liquid Waste Disposal Facility (LWDF) (116-N-1 waste site), the 1325-N LWDF, (116-N-3 waste site), the 1324-N Surface Impoundment (120-N-2), and the 1324-NA Percolation Pond (120-N-1 waste site). The permit modifications were made to reflect the current cleanup activities and ensure that all activities conducted are in compliance with RCRA Permit, Dangerous Waste Portion. All modifications have been reviewed and approved by the State of Washington Department of Ecology (Attachment 2).
